Description

The Eternal Thermostat Cable is a device designed for temperature regulation, offering precise and efficient control in heating or air conditioning systems. Its compact design facilitates integration into existing facilities, ensuring stable and reliable operation.

Technical characteristics

- Mark: Eternal
- Model: Cable
- Type: Thermostat

This equipment allows to maintain the desired temperature constantly, optimizing the energy consumption and improving the user comfort. Its simple operation makes it suitable for various applications where reliable thermal control is required.

Specifications

EAN	8499211691640
Manufacturer	Koolair
