Description

The Gripforce flexible screwdriver is a tool designed to access screws and nuts in reduced or hard-to-reach spaces thanks to its flexible stem. It has a 1/4" male quadradillo that allows mounting hexagonal vessels, facilitating tightening and loosening without losing the piece when removing it.

Technical characteristics

- Type: Flexible screwdriver with coupling for glasses
- Attachment: 1/4" male quadradillo
- Material of the stem: Chromium-vanadium and molybdenum steel
- Metallic finish: Chromed, corrosion resistant
- Mango: Black and blue thermoplastic material with top non-slip grip

Its design allows to reach components located behind panels or next to other elements where a rigid tool does not arrive. The acouple secures the glass, preventing it from being released into narrow holes.

The ergonomic handle improves control and reduces fatigue during prolonged work, being useful for mechanics, installers and general maintenance.

Specifications

Colour	Negro / azul

EAN	8445187480962
Manufacturer	COFAN
Material	Acero al cromo vanadio
