Description

Support with red LED for 1click® mechanisms with light or pilot light that you can find in the Simon 77 series within the category "control mechanisms". Enjoy the pleasure of installing your elements in just two steps: insert and tighten, with those two simple movements you can have your element installed in a matter of minutes. Now the mechanisms of the Simon 77 series are faster, safer and more comfortable.

The new mechanisms allow connection without stripping or twisting cables, saving on safety and time. Now they incorporate more space with 45° terminals to increase mobility when placing the mechanism in the flush-mounting box. It is safer since the cable is perfectly connected without the danger of any of the copper wires being loose. In addition, it is suitable for the entry of rigid and flexible cables.

Specifications

Colour	Red
EAN	8421053077825
Manufacturer	Simon
Nominal voltage (V)	230V
Piece type	Accessories
Series	Simon 75
