Frame bezel

Model City

Manufacturer: **FERMAX**[View product online](#)

Description

Description

The cover frames allow you to replace old plates of porter and video entry-phone by the new models of the series CITY, covering the gap and integrate perfectly with the finish of the new plates.

There is the extension Kit to frames double and triple, which consists of the profiles necessary to convert the framework simple, double or triple, as required, as well as the foundation and fixing screws required.

New plate CityLine.

Cityline is the line of plates of street "- profile, continuous" for buildings.

This new plate model is more robust, more luxurious and of greater aesthetic quality and functional. The new design integrates, in its version of video entry, the functions of video and audio in the same module.

It is characterized by its profile curvo-convex, while maintaining the same features of its predecessor. There is a full compatibility between both models, ensuring your replacement and replacement immediate.

They are manufactured in anodized aluminium of high resistance to weather and to climate changes. It incorporates new materials such as zamak chrome ends and push-buttons

The plates Cityline does not include the recessed box or surface. This must be requested separately.

It is possible to combine two or more plates, provided that they are of the same series. To flatten the layers perfectly, you should use a set of spacers each two plates that are installed between your boxes recessed.

Color aluminum.

Specifications

Weight: 0,3374 kg
