Description

Lighting devices - It becomes light or pilot lamps LN4742V230 switch - 1P - 16 AX - 250 V ~ - automatic Borne - 2 modules - Tech

Livinglight Bticino

the series of electrical mechanisms Livinglight is one of the most avant-garde series, worked with a better design and a favorite of interior designers and architects.

Key Features:

Modernization, characterization and light These are the design values of the new series mechanisms and interurptores.

more modern lines : The lines and shapes that characterize the design of the mechanisms and switches **Livinglight** have been updated based on the trends of contemporary design

the mechanism and switch **Livinglight Bticino** is a combination of elegant shapes, colors, materials and surfaces to satisfy all aesthetic tastes: minimalist, sophisticated, traditional and ostentatious.

Light : Highlight the mechanisms and switches, acclimatized and Ambienta without being noticed. Light is the essence of this series of elécticos mechanisms that now more than ever, helping to create a new and unique harmony.

Axial mechanisms

BTicino presents the alternative to traditional tilting mechanisms. Thrust mechanisms are ideal for increasing the aesthetic value of the new plate AIR element. A proposed high level for quiet and safe mechanism, the result of the most sophisticated technology.

Specifications

Colour	Tech
EAN	8005543420881
Manufacturer	BTICINO
Piece type	Electrical mechanisms
Series	Bticino Livinglight
